

# SOILS TESTING

***ELEMENTARY - HIGH SCHOOL AGED STUDENTS***

## **Soil Testing**

This is an interactive lesson with "hands on activity," which guides students through the process of collecting and testing soil. Both the method and results are explained to the students, as well as the importance of having soil tested, and how it relates to the health of our natural resources. Average running time is about 30 minutes. Water is needed. Soil to test, and a table to display the model on, is needed as well.
