## **Watershed Modeling**

In this demonstration, students are introduced to the concept of a watershed. Using a plastic model of a town, equipped with buildings, vehicles, animals, roads, and streams, students learn what a watershed is, which one they live in, effects from industries, construction, golf courses, farms, and neighborhoods, and solutions to fix those problems. Average running time is about 30-40 minutes. Water is needed, along with a table to display the model on.
